Education

Vellore Institute Of Technology, Bhopal

Bachelor of Technology (B.Tech) in Computer Science & Engineering

Aug 2023 – May 2027

CGPA: 9.21 / 10.00

Technical Skills

Core Computer Science: DSA, OOP, OS, DBMS, Networks, System Design, Design Patterns, SDLC, Agile Methodologies

Programming & Development: Java, Python, JavaScript, TypeScript, SQL, React.js, Next.js

Backend & Databases: Node.js, Express.js, NestJS, REST APIs, JWT Authentication, MySQL, Prisma

Applied AI & Data Science: EDA, Generative AI, LLMs, EnergyPlus, Streamlit, Google Gemini API, Qwen2.5, Ollama

Cloud, DevOps & Tools: Git, GitHub, GitHub Copilot, GitHub Actions, Docker, AWS, Kubernetes, CI/CD,

Experience

MPOnline Limited (Govt. of MP & TCS JV)

Advanced Software Engineering & Development Intern

May 2026 – Aug 2026

Bhopal, India

- Built REST APIs and backend components using Java, C++, Python, and SQL in an industry-oriented engineering program.
- Applied SDLC and Agile methodologies across 6 sprints with comprehensive unit and integration testing for live projects.
- Tested 20+ API endpoints using Postman, documented with Swagger, and managed code with Git for version control.
- Collaborated with senior engineers on database design and systematic debugging to deliver reliable software features.

Ethnus

MERN Stack Intern

Jul 2024 – Oct 2024

Remote

- Developed 4 full-stack application modules using MongoDB, Express.js, React.js, and Node.js with modular component architecture.
- Built 15+ RESTful APIs with JWT-based authentication and secure CRUD operations for core application features.
- Created 10+ responsive React interfaces using Redux for state management and Tailwind CSS for consistent styling.
- Optimized MongoDB queries with strategic indexing and aggregation pipelines, reducing API response latency by 40%.

Projects

AshenRitual – Full-Stack E-Commerce Platform [Live Demo](#)

Next.js, TypeScript, NestJS, PostgreSQL, Prisma, REST APIs, JWT, Gemini API

Feb 2026 – Present

[GitHub](#)

- Architected a scalable full-stack e-commerce platform using Next.js, TypeScript, NestJS, PostgreSQL, and Prisma ORM.
- Designed 50+ REST API endpoints across 25+ Prisma models with comprehensive input validation and error handling.
- Secured 20+ routes with JWT authentication, HTTP-only refresh tokens, RBAC, bcrypt, Helmet, and rate limiting.
- Built VESPER, an AI-powered wardrobe intelligence system using Google Gemini API for personalized outfit recommendations.
- Implemented responsive UI using Tailwind CSS, Framer Motion, and React Server Components for performance and SEO.

Uni-Verse – Campus Resource Management Platform [Live Demo](#)

React, Node.js, Express.js, MongoDB, REST APIs, JWT, RBAC, Tailwind CSS

Mar 2025 – Jul 2025

[GitHub](#)

- Led development of a MERN-based campus platform with 20+ RESTful APIs for resource and user management.
- Implemented JWT authentication and role-based access control across 3 user roles for secure permission-based access.
- Designed responsive, reusable React components with Tailwind CSS, improving UI consistency across the platform.
- Integrated an AI-powered campus assistant using LLM-based query processing to provide contextual responses to student queries.

Beacon – Building Energy Analytics & Control Optimization Network [Live Demo](#)

Python, EnergyPlus, Qwen2.5, Ollama, Streamlit, Pandas, Plotly

May 2026 – Jul 2026

[GitHub](#)

- Built an automated energy optimization platform integrating EnergyPlus building simulations with Qwen2.5 through Ollama.
- Engineered a modular Python pipeline to automate EnergyPlus simulation execution, process building energy data, and generate AI-driven optimization recommendations, achieving a 3.57% reduction in simulated electricity consumption.
- Created interactive Streamlit dashboards with Plotly visualizations for real-time building energy performance monitoring.
- Applied EDA and feature analysis to identify energy consumption patterns and support data-driven optimization decisions.

Achievements & Certifications

- NPTEL Gold Elite (Top 5%) in Marketing Analytics and completed Machine Learning certification from NPTEL in May 2025.
- Completed 100-day Java coding challenge focused on Data Structures and Algorithms with 200+ practice problems solved.
- Earned MERN Stack certification from Ethnus and Blockchain Specialization from University at Buffalo in Oct 2025.
- Served as Disciplinary In-Charge at Winter Fest 2025, coordinating 15+ team members for a 5000+ attendee university event.

Industrial Exposure

- C-DAC Bangalore (Sep 2025):** Explored high-performance computing environments, supercomputer architecture, parallel computing, and distributed systems through practical demonstrations.
- BSNL RGM TTC Chennai (Oct 2025):** Studied telecom infrastructure, routing, switching, network protocols, optical fiber communication, and network architecture through technical sessions.
